Scenes

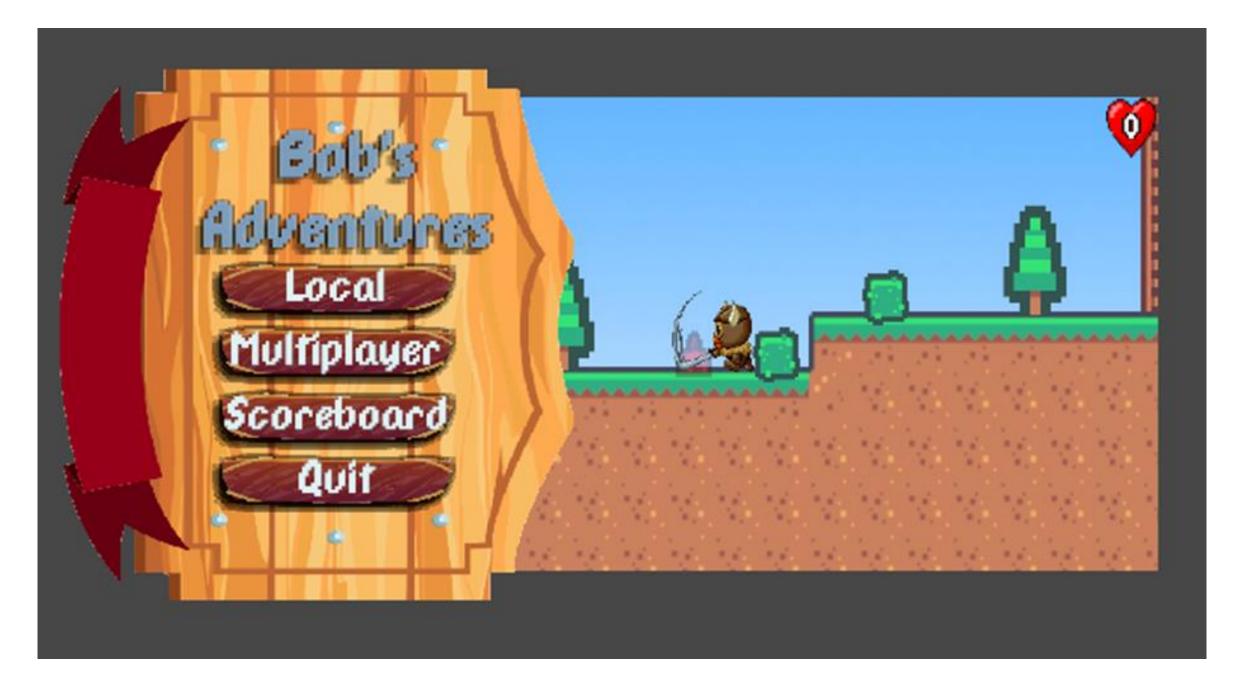

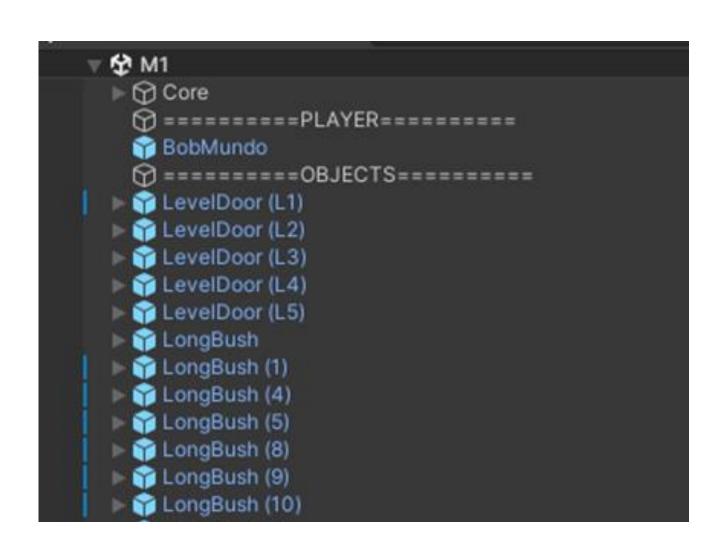

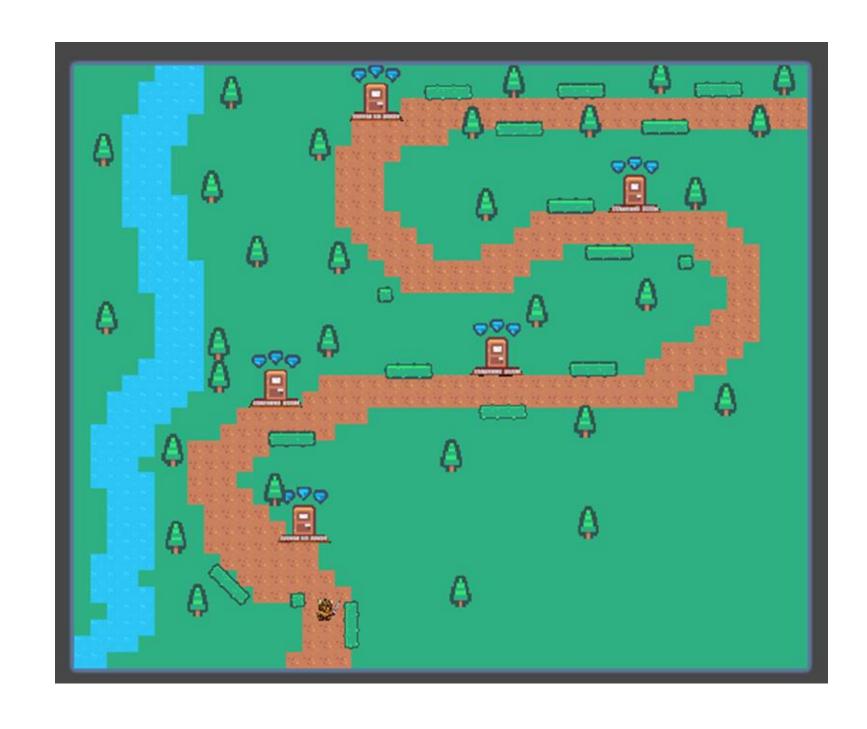

MAIN MENÚ

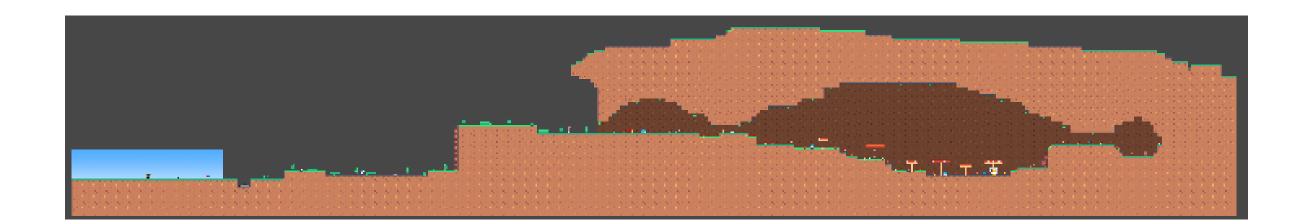

MUNDO 1

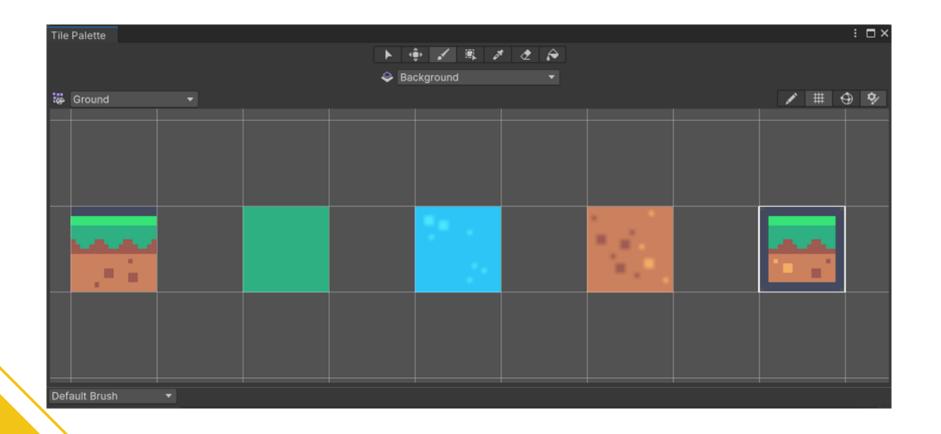

MUNDC 1 NIVEL 1

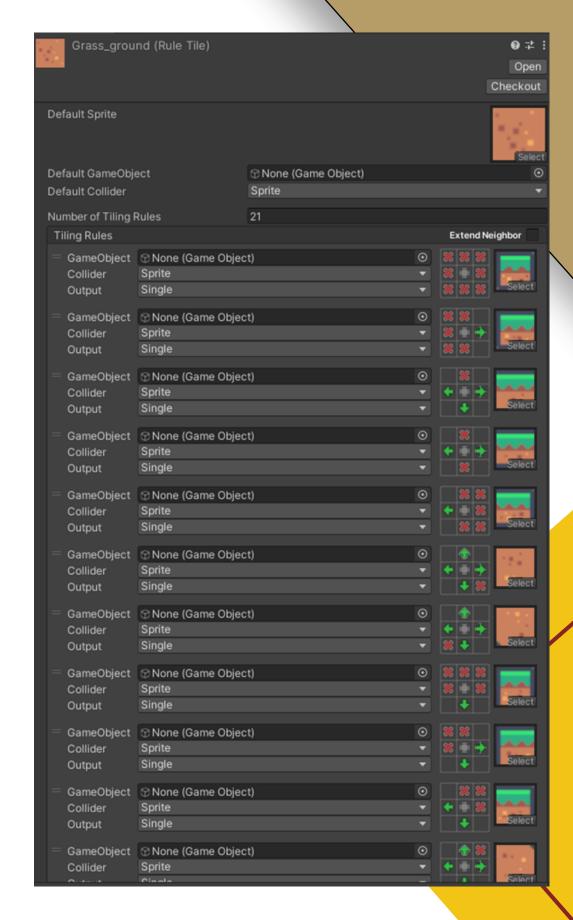

CREACIÓN DE MAPA

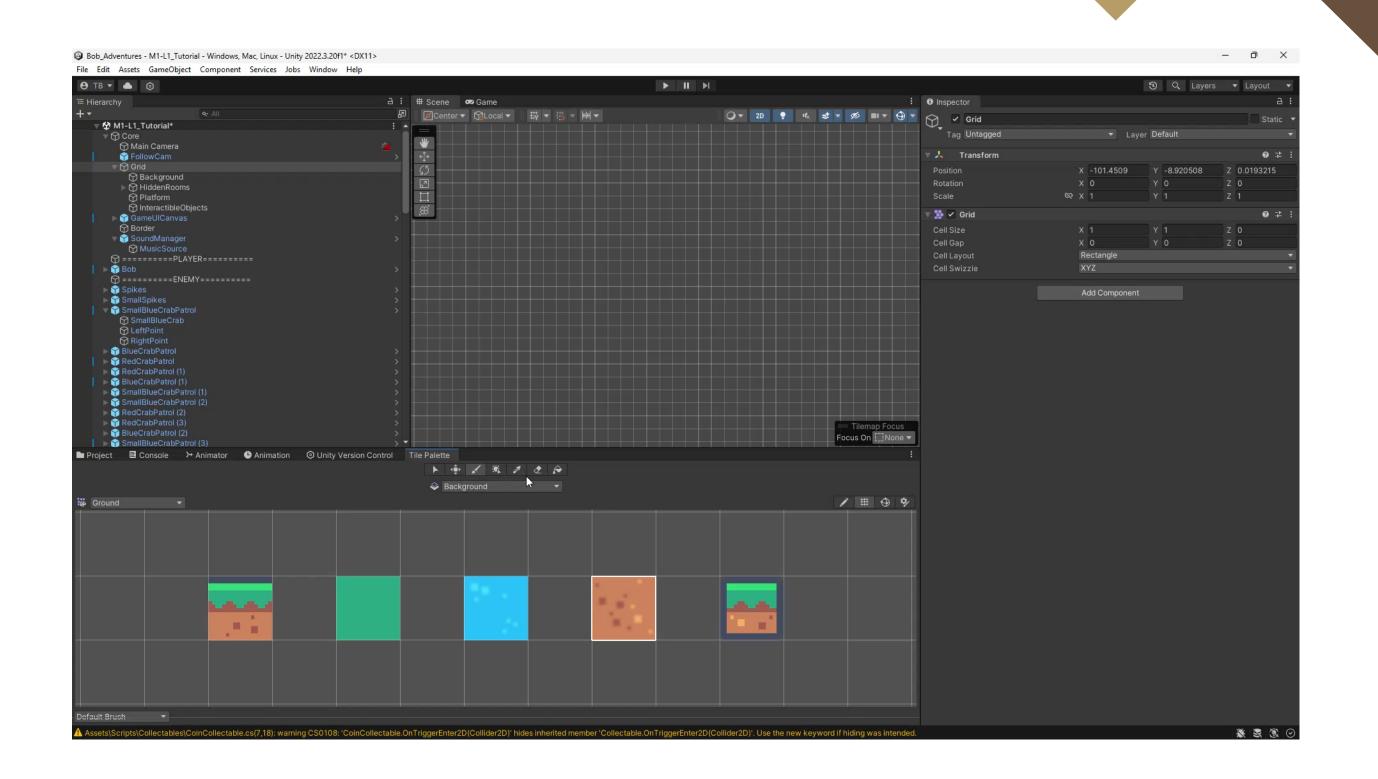

Para crear un mapa se debe de usar un grid. En dicho grid se dibuja el terreno del mapa utilizando un pallet.

EJEMPLO

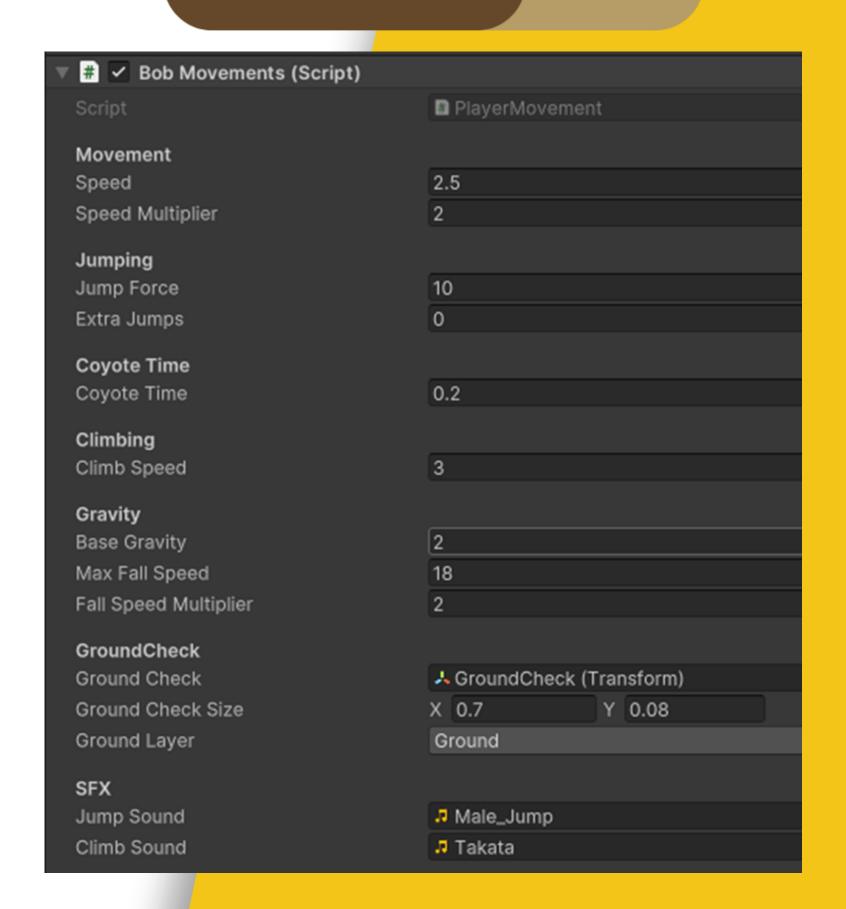

Scripts

Hay 24 Scripts creados.

Cada script creado tiene una interfaz en el editor de unity para poder asignar las variables necesarias y/o opcionales.

Izquierda

Correr

Derecha

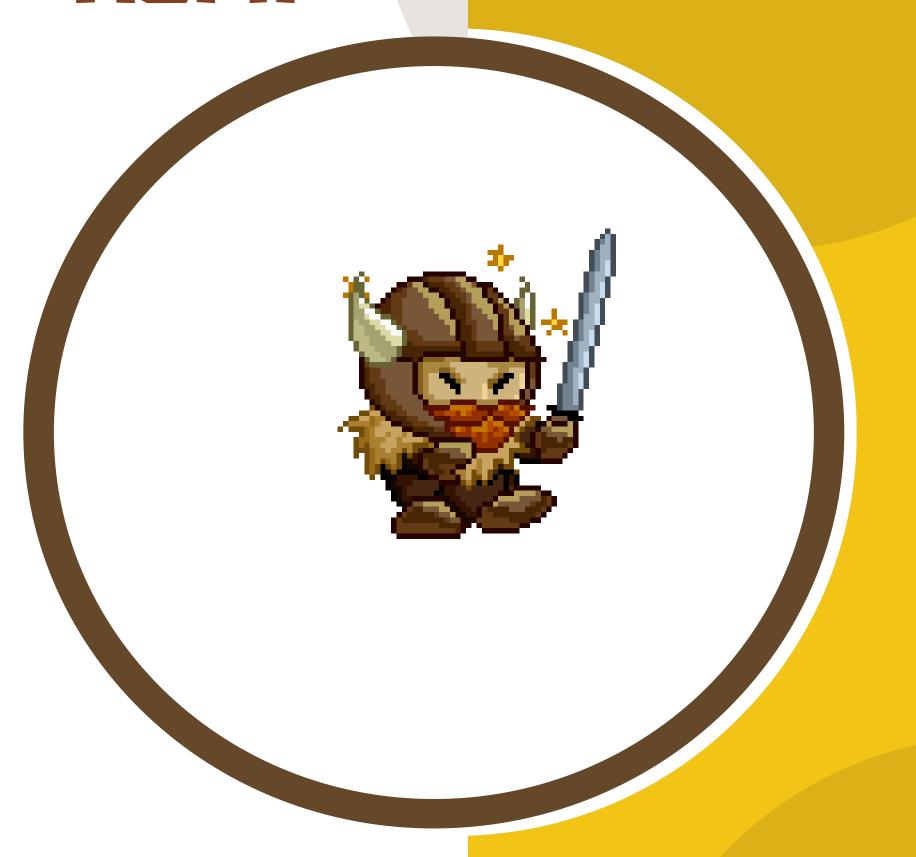

MOVIMIENTOS

Atacar

Morir

ENEMIG05

Blue Crab

Red Crab

Yelookto

public void Save()
{
    PlayerPrefs.SetInt("Coins", coins);
    PlayerPrefs.SetInt("SkillPoints", skillPoints);
    PlayerPrefs.SetInt("Lives", lives);
    PlayerPrefs.Save();
}
```

CARGADO

```
coins = PlayerPrefs.GetInt("Coins", 0);
skillPoints = PlayerPrefs.GetInt("SkillPoints", 0);
lives = PlayerPrefs.GetInt("Lives", 3);
```

DEMOSTRACIÓN

Conclusión

Mi conclusión es, programar con unity es divertido, pero tiene muchos objetos, a la hora de crear un nivel se acumulan los objetos que vas añadiendo. También tienes que crear varios Scripts debido a la diversidad de las funcionalidades de cada objeto. Teniendo en cuenta esos dos puntos programar en unity requiere mucho tiempo y dedicación.
